

Offshore resource pool for jack-up accommodation rig on DK-sector

OSM Crossway Eagle ApS

The OSM Maritime Group provides high quality maritime services, hereunder offshore, ship management and crew management, operating more than 450 units worldwide. We work from 27 different office locations worldwide, and Arendal in Norway is our main office. We can therefore offer a broad range of global services to our diversified customer base, and aim to deliver the best value money can buy in the segments in which we operate. We have grown substantially over the years and we are recognized as a leader in the field of third party Maritime Services.

We invite you to join us in shaping OSM to be successful in the future!

We are currently seeking qualified personnel for temporary/ad-hoc assignments offshore for a jack-up accommodation unit on DK-sector.

The rig is currently operating on Dan B for Maersk, and helicopter flights go out from Esbjerg heliport.

We are looking for qualified personnel who are interested in being included in a resource pool, with assignment-to-assignment based employment.

Safety Officer

The Safety Officer onboard must have in-depth knowledge of operation, maintenance and instruction to personnel on board regarding Lifesaving- and Fire Fighting Equipment, and is to ensure that the emergency and safety equipment is maintained properly and according to statutory regulations and according to any guidance issued by the manufacturer or supplier and shall keep records of such maintenance. He/she assists the OIM in investigating and maintaining records of accidents and incidents, including HSE documentation, and co-ordinates safety work on board with the Operator's Safety Department. The Safety Officer is also responsible for training of crew in accordance with emergency procedures and duties, and for conducting emergency preparedness and rescue drills, including MOB boat drills.

The Safety Officer furthermore monitors that all work on board is being performed in a safe manner, including that all safety instructions are followed in accordance with Company's BMS procedures, and carries out induction of all new crew members, providing information of emergency signals, duties, emergency stations and type of emergency equipment on board.
